

To Update Windows

Click on Start

Click on Help & Support

Under the Section: PICK A TASK

Select: "Keep your computer up-to-date with *Windows Update*

Follow the prompts.

OR: Most often the Windows Update option is available by clicking on START & ALL PROGRAMS. If you do not see it in the list in the upper left hand corner, scroll through the programs listed.

NOTE: When you receive a notice down by the "clock area" of your task bar that "New updates are ready to install" Click on the little windows icon associated with the message and do the updates. This will keep your computer up-to-date and patches that are available to protect your computer from viruses are automatically made.

Microsoft Windows no longer support Windows 95, 98 or ME.
